

Java 111 Chapter 8 (from version 1)

Total Questions: 17

Most Correct Answers: #16

Least Correct Answers: #8

1. An abstract class can only have abstract methods.

2/12 ☐ A True

9/12 ☒ B False

2. When you don't want a class to be instantiated (in other words, you don't want anyone to make a new object of that class type) mark the class with the "abstract" keyword.

10/12 ☒ A True

1/12 ☐ B False

3. Which of the following are true?

4/12 ☐ A An interface must be created using the keyword "abstract".

7/12 ☒ B An interface defines only abstract methods.

8/12 ☒ C A class can implement multiple interfaces.

6/12 ☒ D All interface methods are implicitly public.

4. All objects come out of an `ArrayList<Object>` as type `Object`, unless you use a cast.

7/12 ☒ A True

4/12 ☐ B False

5. Multiple inheritance is allowed in Java, meaning you may extend multiple classes.

3/12 ☐ A True

8/12 ☒ B False

6. If you override a superclass method in a subclass, you cannot invoke (call) the superclass method.

2/12 ☐ A True

9/12 ☒ B False

7. You can extend only one class (i.e. you can have only one immediate superclass).

11/12 ☒ A True

0/12 ☐ B False

8. Write an abstract method called eatCake that accepts one parameter for the number of slices to eat and returns a String.

Anon anon0b376cd0389d4bd9

✗ public abstract eatCake(int numberSlices);

Anon anon63e26299e1884b42

✗ public abstract String eatCake(numberOfSlices);

Anon anon707f6632522c44cb

```
public String abstract eatCate(int numSlices)
{
```

✗ }

Anon anon70d5ee89101f4ba7

✗ public abstract eatCake(int numberOfSlices);

Anon anonad2c8d8d1f974697

```
public abstract String eatCake(String numberOfSlices) {
return "YUM"
```

✗ }

Anon anonba7816ceadff4125

✗ public abstract String eatCake(int numberSlice);

Anon anonbb56d6c9249b4426

✗ public abstract String eatCake(int SlicesToEat);

Anon anonc1b092d992954bb1

```
public abstract eatCake(int numberSlices) {
return "Eat cake";
```

✗ }

Anon anonc34814ce53cc40d0

```
public abstract String eatCake(String numberOfSlices) {
return numberOfSlices;
```

✗ }

Anon anonde6a3cc1d3dc4960

```
public abstract String eatCake(Int numberOfSlices) {
return "Eating cake";
```

✗ }

Anon anonf6cb6fb679ca4183

✗ public abstract String eatCake(int slices);

9. Given the following: `JavaRockStar rockstar = new JavaRockStar();` what is the object reference variable?

- 0/12 ☐ A `JavaRockStar`
- 0/12 ☐ B `new`
- 11/12 ☒ C `rockstar`
- 0/12 ☐ D none of the above

10. Given the following: `JavaRockStar rockstar = new JavaRockStar();` what is the object reference type?

- 11/12 ☒ A `JavaRockStar`
- 0/12 ☐ B `new`
- 0/12 ☐ C `rockstar`
- 0/12 ☐ D none of the above

11. Given the following: `SuperStarCoder rockstar = new JavaRockStar();` what is the object reference type?

- 0/12 ☐ A `JavaRockStar`
- 0/12 ☐ B `rockstar`
- 11/12 ☒ C `SuperStarCoder`
- 0/12 ☐ D `new`
- 0/12 ☐ E none of the above

12. Given the following: `SuperStarCoder rockstar = new JavaRockStar();` what is the actual object type?

- 10/12 ☒ A `JavaRockStar`
- 0/12 ☐ B `rockstar`
- 1/12 ☐ C `SuperStarCoder`
- 0/12 ☐ D `new`
- 0/12 ☐ E none of the above

13. Given the following, what output do you expect?

- 4/12 ☐ A Line 10 and 14 will each run twice.
- 2/12 ☐ B Line 10 will run twice, line 14 will run once.
- 4/12 ☒ C This will not compile due to line 29.
- 2/12 ☐ D This will not compile due to line 27.
- 0/12 ☐ E None of the above

```
1 public abstract class Programer {
2     public abstract void sayHello();
3 }
4
5 public class SuperStarCoder extends Programer {
6     public void sayHello() {
7         System.out.println("Hi, my name is SuperStarCoder!");
8     }
9 }
10 public class JavaRockStar {
11     public void sayHello() {
12         System.out.println("Hi, my name is JavaRockStar!");
13     }
14 }
15
16 public class ProgramerTest {
17     public static void main(String[] args) {
18         SuperStarCoder superStarCoder = new SuperStarCoder();
19         superStarCoder.sayHello();
20         JavaRockStar javaRockStar = new JavaRockStar();
21         javaRockStar.sayHello();
22     }
23 }
24
25 // Line 27: This line will cause a compilation error because it is not a valid statement.
26 // Line 29: This line will cause a compilation error because it is not a valid statement.
```

14. What is the proper way to create an interface called Payable?

- 0/12 ☐ A public abstract interface class Payable {}
- 2/12 ☐ B public abstract Payable {}
- 0/12 ☐ C public abstract interface class Payable extends Payable {}
- 10/12 ☒ D public interface Payable {}
- 0/12 ☐ E interface PayMe() extends Money implements Payable()

15. A class must extend a superclass before it can implement an interface.

- 2/12 ☐ A True
- 10/12 ☒ B False

16. If a class does not pass the IS-A test, it probably should not extend anything (other than Object).

- 12/12 ☒ A True
- 0/12 ☐ B False

17. An interface is a 100% abstract class, meaning it defines only abstract methods.

- 9/12 ☒ A True
- 3/12 ☐ B False
